Japanese Kuromoji, then okurigana alignment and verb merging; the lemma (below) is what a click looks up

ホーム	の	かべ 壁 wall	の	デザイン design	が	ほんだな 本棚 bookshelves	の	よう	に	なっています → なる

Ruby segments inside one token (dashed boxes); red: readings taken from Kuromoji's pronunciation field

とりあつか 取り扱い 取り扱い	かあ お母さん お母さん	た 食べられなかった merged; lemma 食べる	おう 大きい expected おお	おうさか 大阪 expected おおさか

Mandarin Jieba, Mandarin dictionary; pinyin per word (pinyin-pro); Traditional converted to Simplified (OpenCC)

nà zhǒng 那种	běi jīng 北京	yuán zhī yuán wèi 原汁原味 original	de 的 of	hú tòng 胡同 lane	shēng huó 生活 to live

Cantonese Jieba, separate Cantonese dictionary; Jyutping per word (to-jyutping); characters kept as written

faan6 飯 meal	m4 hai6 唔係 to be not	jat1 一 one	wun2 碗 bowl	wun2 碗 bowl	hai6 係 is	jat1 一 one	go3 個	faan6 飯 meal	kau4 球	jat1 一 one	go3 個	bo1 波 a ball	gam2 joeng2 咁樣	gaa3 㗎

Vietnamese backward maximum matching over syllables (VNEDict); the gloss takes the reading's place

Mình	là that	người man	Nga, no match	và and	mình I	sống life	ở Việt Nam in Vietnam	hơn -er	bảy seven	năm five	rồi. no match

Without the final full stop, matching from the right takes the longest entry: bảy (seven) + năm rồi (last year) (here: "seven years now")
